Subject: Qualification Standards During Initial Action

March 22, 2004

There appears to be varying interpretations within the federal agencies regarding the application of 310-1 qualification/certification standards to local, non-federal resources, particularly during initial action. The following points summarize NWCG policy:

- The 310-1 qualification/certification standards are mandatory only for national mobilization of wildland fire fighting resources.

- During initial action, all agencies (federal, state, local and tribal) accept each other’s standards. Once jurisdiction is clearly established, then the standards of the agency(s) with jurisdiction prevail.

- Prior to the fire season, federal agencies should meet with their state, local and tribal agency partners and jointly determine the qualification/certification standards that will apply to the use of local, non-federal firefighters during initial action on fires on lands under the jurisdiction of a federal agency.

- The Geographic Area Coordinating Group should determine the application of 310-1 qualification/certification standards for mobilization within the geographic area.

- On fire where a non-federal agency is also an agency with legal jurisdiction, the standards of that agency apply.
