Appendix 5. Data gap maps for the Pacific Northwest Area.

The top map shows the IDI values based on RAWS, and the bottom map based on RAWS+ASOS stations. The methods and maps are described in detail in Section 3. Points on the maps are permanent RAWS locations. Stations shown in a white area indicates that they were added to the study after the original IDI analysis.
Appendix 6. Data gap maps for the Rocky Mountain Area.

The top map shows the IDI values based on RAWS, and the bottom map based on RAWS+ASOS stations. The methods and maps are described in detail in Section 3. Points on the maps are permanent RAWS locations. Stations shown in a white area indicates that they were added to the study after the original IDI analysis.
Appendix 7. Data gap maps for the Southern California Area.

The top map shows the IDI values based on RAWS, and the bottom map based on RAWS+ASOS stations. The methods and maps are described in detail in Section 3. Points on the maps are permanent RAWS locations. Stations shown in a white area indicates that they were added to the study after the original IDI analysis.
Appendix 8. Data gap maps for the Southern Area.

The top map shows the IDI values based on RAWS, and the bottom map based on RAWS+ASOS stations. The methods and maps are described in detail in Section 3. Points on the maps are permanent RAWS locations. Stations shown in a white area indicates that they were added to the study after the original IDI analysis.
