MITIGATION MEASURES

INTERAGENCY INCIDENT BUSINESS MANAGEMENT HANDBOOK
12.7-1 - Work/Rest Guidelines: Work/rest guidelines should be met on all incidents. Plan for and ensure that all personnel are provided a minimum 2:1 work to rest ratio (for every 2 hour of work or travel, provide 1 hour of sleep and/or rest).

Work shifts that exceed 16 hours and/or consecutive days that do not meet the 2:1 work/rest ratio should be the exception, and no work shift should exceed 24 hours. However, in situations where this does occur (for example, initial attack), incident management personnel will resume 2:1 work/rest ratio as quickly as possible.

Enclosed are Operating Guidelines for incident business administration activities on the __________. These guidelines are provided to support incident management team (IMT) operations and to provide consistency in incident business management operations throughout the unit. Deviation from these guidelines will be negotiated with the Incident Business Advisor (IBA) or Agency Administrator (AA) or Administrative Representative in advance.

**Incident Business Advisor**

Delegation of Authority. The incident agency’s Administrative Representative (name, work phone (###) ###-####; cell phone (###) ###-####, home phone (###) ###-####) is the delegated IBA for the incident agency. An off-unit IBA may be resource ordered to assist the unit. During the IBA’s absence, any of the following may be delegated IBA responsibilities, depending on availability:

<table>
<thead>
<tr>
<th>Name</th>
<th>Position</th>
<th>Work Phone #</th>
<th>Home Phone #</th>
</tr>
</thead>
</table>

An off-unit IBA may be resource ordered to assist the unit.

**Responsibilities**

The IBA is a liaison between the Agency Administrator and the IMT. The IBA will make visits to any established incident command post, staging area, and other incident support locations, e.g., expanded dispatch, buying team, administrative payment team, to facilitate communication and successful incident business practices. Technical specialists may accompany the IBA to assist in specific areas of concern, e.g., business, fiscal or acquisition personnel. The IBA will provide all incident support activities with telephone number(s) to ensure 24-hour contact for business management assistance.

In dealing with cost containment issues, it is important for the IBA to be a partner with the IMT and AA for effective cost containment balances, taking into consideration fire suppression tactics and strategies relative to the incident. This requires aggressive action to highlight inappropriate or questionable procurement requests as well as ineffective use of items under contract, plus...
expansion of alternatives, whereby joint IC, AA and IBA decision can be made.

**Organization and Communications**

Names of the individuals responsible for counterpart activities:

**Acquisition** (name, work phone, cell phone, home phone)

**Property Management** (name, work phone, cell phone, home phone)

**Unit Dispatch** (name, work phone, cell phone, home phone)

**Injury Compensation** (name, work phone, cell phone, home phone)

**Claims (Property Loss/Damage)** (name, work phone, cell phone, home phone)

At a minimum, the Finance/Administration Section Chief (FSC) and IBA will establish a set time for daily communications for information exchange and to report current progress of incident business management operations.

**Note:** It is recommended the IBA contact the FSC after the IMT has been notified of release from the incident, to ensure all financial documents are ready for transition to the incident agency, payment office or replacement IMT and to check on the status and condition of payments processed by the Finance/Administration Section. Follow-up will also be made following payments to provide information on fiscal, procurement, etc. insights.

The Procurement Unit Leader is responsible to communicate with the Supply Unit Leader and Buying Team leader throughout the incident.

The open flow of communication between these parties will facilitate acquisition needs and property tracking.
SAMPLE INCIDENT BUSINESS OPERATING GUIDELINES – Continued

Procurement

The incident agency Administrative Representative provides the Finance/Administration Section with the Incident Service and Supply Plan. Incident agency acquisition staff is available to discuss information provided in the plan.

Service and Supply Plan to include:

- Acquisition Organization Chart including contact work and cell telephone numbers
- Emergency Service Providers (include Agency-Provided Medical Care information, if applicable)
- List of Emergency Equipment Rental Agreements (EERAS) (The IMT is responsible to request copies EERAs as necessary.)
- Supply/Service Vendors (include copies of Blanket Purchase Agreements)
- Local interagency agreements and operating plans
- Incident Agency and local unit procurement procedures
- Geographic Area Equipment Rates (Interagency Incident Business Management Handbook, Chapter 20)
- Maps - geographical information

Many of the normal restrictions on purchasing supplies and services apply when buying for incident operations. Some exceptions exist for emergency incident acquisition, e.g., commissary items and items in lieu of per diem necessary for operating an incident camp. Procurement personnel will consult with the IBA before purchasing such items.

Meal and motel tickets will be used and must be signed by both the procurement official and the individual(s) to which issued.

Buying Unit Procedures

Initially, incident agency acquisition staff provides acquisition support to the IMT.

The incident agency’s Administrative Representative determines the need to resource order a Buying Team and may assign incident agency acquisition staff

to assist. The Buying Team will follow National Interagency Buying Team Guide operating procedures and adhere to incident agency policy.

The IBA and/or appropriate official consult with the IMT and expanded dispatch regarding Buying Team release date.

Buying Team Leader is responsible to visit the incident command post and incident support locations to establish open lines of communication with IMT personnel (e.g., Expanded Dispatch, Logistics Section Chief, Supply Unit Leader and Procurement Unit Leader) to determine the ordering process.

**Property Management**

The IMT is responsible to cost-effectively manage incident-assigned property, including establishing incident procedures for issuance and return of property.

The Buying Team Leader coordinates with IMT personnel to ensure tracking of sensitive, accountable property.

The IMT is responsible to ensure that property not returned is documented in accordance with incident agency procedures, including, but not limited to vendor invoice deductions, completion of property loss/damage forms.

Incident Replacement. All property treated as replacement will be so described on Agency specific forms, Waybill, or left on the incident for rehab or mop up (manifest to the incident unit). All property left on the unit at the close of the incident, will be properly temporarily transferred on the Agency’s form.

**Commissary**

The incident agency approves the use of agency commissary.

The IMT may resource order a national contract commissary. The FSC is designated as the contract commissary Contracting Officer's Representative (COR) and will follow requirements and procedures established in the national commissary contract, including establishment of hours of operation, review/approval of items sold, completion of contractor performance evaluation, invoicing.
Compensation for Injury and Agency-Provided Medical Care

Incident agency’s contact: (Name) Work telephone (###) ###-####. The IMT Compensation/Claims Unit Leader follows paperwork disposition procedures in the IIBMH.

All medical services, agency-provided medical care agreements, physicians, burn center, forms, etc., are included in the Service and Supply Plan that will be given to the Finance/Administration Section. If the plan is not readily available, contact the assigned Buying Unit or incident agency’s acquisition staff for a copy of the information.

Information Systems Management

The incident agency will provide the requested computer needs available to them. Although the computer system may be used in support of the incident, it remains under the control of the incident agency’s computer specialist and Administrative Representative.

Following is a list of (unit name) computer personnel and their home telephone numbers in contact order.

Payments

The IBA, and/or FSC, and incident agency Administrative Representative determine the need for an Administrative Payment Team (APT).

Normally, the APT will be ordered for incidents expected to exceed 2 weeks in duration and the incident agency cannot provide payment support using regular payment procedures.

Prior to processing any payments, the APT meets with the incident agency’s budget/fiscal staff to ensure procedures are in place to avoid duplicate payments.
SAMPLE INCIDENT BUSINESS OPERATING GUIDELINES – Continued

Depending on the length of the incident and size of vendor's operations, partial payments may be made on a case-by-case basis. All payment documents should be submitted as they are closed out for processing.

**Incident Agency Payments**

A representative from the budget/fiscal acquisition staff will visit Finance/Administration units to ensure accuracy of payment processes.

Invoices are to be forwarded to budget/fiscal or acquisition, as soon as completed, to ensure timely payment to vendors and contractors. Hand-deliver invoices upon incident closeout to the budget/fiscal unit. Ensure a Finance/Administration Section employee is available to discuss incomplete payments or those requiring additional clarification.

**End of Pay Period Time & Attendance Reports**

The IBA and FSC will determine the most efficient and effective means for processing/communicating pay information to home units at the end of each pay period.

**Law Enforcement**

All criminal investigations will be conducted by the assigned criminal investigators and law enforcement officers, and will be supervised by the Agency Law Enforcement Coordinator (name).

Incident assigned law enforcement personnel are responsible to complete other types of investigations (claims, motor vehicle accidents, etc.).

**Closeout**

The Incident Finance Package will meet the standards outlined in Chapter 40 of the Interagency Incident Business Management Handbook. The ____________ (unit) also requires the following:
The IBA and Administrative Representative will participate in the IMT exit interview. The IBA and Administrative Representative provide input to the Agency Administrator regarding IMT performance related to business management.

**Scenario**

- **Multiple IMTs managing one incident**: One 209 created. 1) Create separate 209 for each incident within the complex. 2) One 209 for the complex may be created. Incidents with individual 209s should finalize those 209s. IMT may elect to use one pre-existing incident 209 (and the same incident number), or create a new one (with new incident number).
- **One IMT managing multiple incidents**: Aggregate merged fires on one 209. If each fire has an existing 209, finalize one 209 ad use the other for the new merged fire (Indicate merge in Remarks on both 209 for cross referencing).
- **One IMT managing multiple incidents – Two or more incidents have merged (burned together)**: Continue to report separate on individual 209s.
- **One IMT managing multiple incidents – Two or more incidents have merged (burned together)**: Demob resources from non-primary fires and add to primary fire with new resource numbers. If merged in database, cannot split back out without a lot of manual work.
- **Multiple incidents managed by one IMT to now be managed by multiple IMTs – maintaining integrity of individual fires**: IMTs continue process of 209 submission for each fire without interruption.

<td>Reorganization or split of a complex or incident, multiple IMTs</td>
<td>Various options and combinations of data management (Issue: Lose the integrity of individual fires and creates issues through all fire systems)</td>
<td>Can accommodate moving an incident in or out of another complex or incident</td>
<td>If fires are in one database, very difficult to split into separate databases. Difficult to keep historic integrity once the database is separated out.</td>
<td>If a new FireCode is created, should document the updates. Any changes to complexes and associated fires.</td>
<td>Not difficult</td>
<td>Will need individual incident number and fire code to process supply requests.</td>
<td>Complicated for 209 reporting. A split of one fire under multiple IMTs: initiate new 209 for one of the fires (assuming a 209 already exists for the pre-split fire). Indicate split on both 209s. A split of a complex, multiple IMTs: fires that previously had individual 209s should reactivate those 209s under their original incident numbers. Or initiate new 209s under new incident numbers if none existed previously.</td>

<td>No effect</td>
<td>Reluctant to reassign due to losing direct control of resource</td>

<td>Do not create a new FireCode when fire crosses jurisdictional boundaries – One FireCode per incident</td>
<td>No effect</td>
<td>No effect as long as the incident order and fire code does not change.</td>
<td>Two GA’s may agree to split the incident between them. The IMT must submit a new 209 to the new GACC (will require a new incident number, but not necessarily a new incident name). Acres, resources, costs, etc., must also be split accordingly. The two geographic areas need to coordinate reporting burned acres by ownership on each GA’s respective Situation Reports (done by the local dispatch centers).</td>
