

**NWCG Data Standard**  
**Fire Size Class Code**  
**Standard Data Values**

February 19, 2009

Standard data values are provided when a data attribute has a pre-determined set of terms, codes, and/or numbers that must be used in order for the data to be valid. The purpose of standard data values is to ensure consistency and accuracy within a system and across multiple systems.

The following list provides NWCG's standard data values for this data attribute:

<b>Value</b>	<b>Description</b>
A	Greater than 0 but less than or equal to 0.25 Acres
B	0.26 to 9.9 Acres
C	10.0 to 99.9 Acres
D	100 to 299 Acres
E	300 to 999 Acres
F	1000 to 4999 Acres
G	5000+ Acres

Guidelines for changing this list of standardized data values can be found in the Change Procedures for this data standard.
