

**NWCG Data Standard**  
**Point of Origin Aspect Code**  
**Standard Data Values**

February 19, 2009

Standard data values are provided when a data attribute has a pre-determined set of terms, codes, and/or numbers that must be used in order for the data to be valid. The purpose of standard data values is to ensure consistency and accuracy within a system and across multiple systems.

The following list provides NWCG's standard data values for this data attribute:

<b>Value</b>	<b>Description</b>
0	Flat
1	North
2	Northeast
3	East
4	Southeast
5	South
6	Southwest
7	West
8	Northwest
9	Ridgetop or Summit

Guidelines for changing this list of standardized data values can be found in the Change Procedures for this data standard.
