2019						
Country ²	California	1		2		
Kincade ⁶	California	1		3		
Total		172	15	117	26	21

*Assessment of the likely fire shelter contribution is done through an investigation or review process which includes interviewing the firefighter and/or examining the shelter deployment site, surrounding items, and the shelter.

¹ Numbers do not include old-style shelters that were also deployed at the same incident.

² Two firefighters deployed one shelter.

³ Firefighters deployed shelters and survived the entrapment, but no assessment of the fire shelter contribution was made by the investigation/review report or agency.

⁴ Fire shelters were deployed by personnel at a Los Angeles County Fire Inmate Camp, not by firefighters involved with the Station Fire suppression efforts.

⁵ Two firefighters deployed one shelter inside the cab of an engine. After the engine ignited, the firefighters attempted to exit. One firefighter exited and survived, the other firefighter did not exit and perished.

⁶ Two civilians joined one firefighter in one fire shelter.
