

FMB Memorandum No. 18-003

Date: 9 July 2018

TO: Fire Management Board Members
FROM: Grant Beebe, Chair, Fire Management Board
SUBJECT: Predictive Services Program Review Update

The Predictive Services Phase II Review (PSP2) Task Group has completed its mission to identify alternative courses of action and recommend solutions to sustain and improve the Predictive Services program. The [Frequently Asked Questions](#) summarizes the purposes and outcomes of both phases of the Predictive Services Program Review.

In June, FMB accepted part of the PSP2 recommendations, to establish a Predictive Services Oversight Group (PSOG) to provide management oversight and direction to the National Predictive Services Program. The draft PSOG charter (attached) will be finalized in July. FMB continues to explore other components of the PSP2 recommendations and expects to complete this work in July as well.

I would like to thank all those who participated on or engaged with the Phase I and II Task Groups.

Questions can be directed to Larry Sutton, FMB liaison to the PSP2 Task Group, lsutton@fs.fed.us or 208-387-5605.
