Configuring TCP/IP on the HP Designjet 1050c, 1050c Plus, 1055cm, or 1055cm Plus front control panel when using a 610n, 615n, or 620n card

NOTE: A delay of approximately 30 seconds may be expected between each step.

1. Press TOP, and press ENTER.
2. Press the Down Arrow to I/O Setup. Press ENTER.
3. Highlight Network Card, and press ENTER.
4. Highlight Configuration, then press ENTER.
5. At Configure Network=NO, press ENTER.
6. Press the Up arrow to change to Configure Network=Yes, then press ENTER.
7. Press the Up arrow until the display reads Configure=TCP/IP NO, then press ENTER.
8. Press the Up arrow to change to Configure TCP/IP=YES, then press ENTER.
9. Press the Up arrow to BootP=YES, then press ENTER.
10. Press the Up arrow to change to BootP=NO, then press ENTER.
11. Press the Up arrow to DHCP=YES, then press ENTER.
12. Press the Up arrow to change to DHCP=NO, then press ENTER.
13. Press the Up arrow until IP Byte1=xxx appears.
14. To change the IP byte (the first octet of the IP address), proceed as follows:
   a. Press ENTER. The top of the display will read, Active Option.
   b. Press the Up or Down arrow to change the number.
   c. Press ENTER.
   d. Press the Up key to continue to IP Byte2=xxx.
15. Configure the subnet mask bytes (SM Byte), syslog server IP address (LG Byte), default gateway (GW Byte), and timeout (TIMEOUT) in the same manner (Press ENTER to make the display read, Active Option, press the Up or Down arrows to change the octet of the IP address, then press ENTER).
   
   NOTE: The syslog server IP (LG Byte) is used only if there is a syslog server on the network. A syslog server is one that receives log messages from the HP Jetdirect print server.

16. Press the BACK button repeatedly until the display reads, Ready. This will save the TCP/IP addresses.

To print a Service Config from HP Designjet 1050c or 1050cm

1. Press the TOP button and highlight the printer icon on the front control panel, then press ENTER.
2. Press the Up or Down arrow to Utilities, then press ENTER.
3. Press the Up or Down arrow to Test Prints, then press ENTER.
4. Press the Up or Down arrow to Service Config, then press ENTER.
