

ICS 206 – Block 8, Emergency Medical Procedures (cont'd)

In the event of a medical emergency provide the following information to the Communications Unit

1. Declare the nature of the emergency.
 - a. Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by Resource and Last name (i.e. POC is TFLD Smith),
4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates),
5. Identify on-scene medical personnel by position and name(i.e. EMT Jones),
6. Identify preferred method of patient transport,
7. Request any additional resources and/or equipment needed,
8. Document all information received and transmitted on the radio or phone,
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur,

Emergency Medical Procedures (Provide detailed emergency medical procedures by Division/Group, Spike Camps, etc. or any staffed incident or event location)

Prepared by (Medical Unit Leader)

10. Reviewed by (Safety Officer)

Instructions for Completion of ICS 206 Block 8, Emergency Medical Procedures

As appropriate the following information should be included in the emergency medical procedures for any staffed incident or event location. The plan must be reviewed and/or updated and approved at each Planning Meeting.

- Include timeframes (ETEs and ETAs) from and to specific locations
- Include GPS coordinates for key locations such as spike camps, drop points, helispots, etc.
- List all potential evacuation resources and/or equipment assigned to the incident/event
- Identify other resources and/or equipment (types, capabilities, availability) not assigned to the incident/event but possibly available if requested
- Identify contingencies (alternate plan or procedure if the preferred option becomes unavailable or identified resources cannot perform the mission)
- Identify specific concerns by location (division, group, geographic area or location)
- Identify environmental influences or factors and resource status changes that might keep the preferred option from working
- Compare to 215-A for mitigation of specific hazards associated with lengthy travel times to access Advanced Life Support
- If the primary evacuation plan is to use aviation, then a secondary plan should be identified including time frames for patient extraction

The procedures must be communicated to the entire incident/event and any external partners/cooperators involved with the incident.
