

# NATIONAL WILDFIRE COORDINATING GROUP

National Interagency Fire Center  
3833 S. Development Avenue  
Boise, Idaho 83705

## MEMORANDUM

Reference: NWCG#032-2010

To: Chair, Fire Executive Council (FEC)

From: NWCG Chair *Wilbur Raage*

Date: July 8, 2010

Subject: Wildland Fire Information Technology Portfolio

Per our earlier conversation, attached is a spreadsheet with the information technology investments that are currently known to the National Wildfire Coordinating Group (NWCG).

In the attached worksheet, the following categories have been created:

- The first sheet of the spreadsheet lists applications currently funded by the NWCG.
- The second sheet identifies applications which have been presented to and endorsed by the NWCG, but are not funded by NWCG.
- The third sheet lists wildland fire applications identified in the National Wildland Fire Enterprise Architecture. NWCG is currently aware of these investments, but has not had substantial input or review of them. Information regarding these investments is not as complete as the above two categories.

The Program Management Unit (PMU) is continuing to work with NWCG's Information Technology Committee (ITC) to investigate applications that have wildland fire application and add them to our inventory. NWCG has also funded development of a wildland fire target architecture, which is currently in the contracting phase. These two efforts will allow a complete look at existing wildland fire applications and provide architecture to guide our future investments at an enterprise level.
