

## NATIONAL WILDFIRE COORDINATING GROUP

3833 S. Development Avenue Suite 161  
Boise, Idaho 83705-5354

M-14-07

MEMORANDUM – 27 June 2014

TO: Geographic Area Coordinating Group Managers, Geographic Area Coordinating Group Chairs  
FROM: Dan Smith, Chair, NWCG Executive Board *Dan Smith*  
SUBJECT: General Services Administration (GSA) Fire Program Transition to Defense Logistics Agency (DLA)

As part of a comprehensive supply transformation initiative, the General Services Administration (GSA) has collaborated with the Defense Logistics Agency (DLA) to transfer its Wildland Fire supply program to the DLA.

Effective May 1, 2014, GSA's wildland fire program was transferred to the DLA with inventory now residing at their Tracy California facility. With the transition to DLA it was necessary to develop new, specialized ordering instructions for wildland fire customers. Three different ordering mechanisms are required for use during this fire season:

- One for the National Fire Caches – Unique to National Fire Caches
- One for Federal Agencies – Use DLA's standard EMALL ordering process
- One for State and Local Entities – Continue using the traditional GSA ordering mechanism

Three ordering mechanisms are needed to accommodate differing administrative requirements.

Ordering instruction documents are hosted on the DLA and GSA websites. The links to those sites will be located on both the NWCG (<http://www.nwcg.gov>) and NIFC (<http://www.nifc.gov/>) websites for quick access. In addition, a document on how to register in DLA's EMALL is available on the NWCG website with the links at <http://www.nwcg.gov>.
