Is Quarantined

**Abbreviation or Acronym:** None

**Data Exchange Name:** IsQuarantined

**Also Known As:** None

**Short Description:** Indicates whether a resource is potentially in conflict with another resource of the same kind, based on the overhead conflict detection rules.

**Controls**

**Collection, Validation, and Exchange Rules**

1. Must be not null on Submit or Update.
2. Default on Submit is 0 unless a potential conflict is detected, in which case the default is 1.
3. Records where IsQuarantined = 1 (true) will be visible and updatable only to the system that created the record.
4. If IsQuarantined is set to 0 (false) and IsValid is set to 1 (true), then participating systems will be able to query and update the resource record.
5. See Integration Specification for the rules that trigger a potential duplicate overhead resource.

**Data Type:** Small Integer

**Case Sensitivity:** N/A

**Minimum Length:** N/A

**Maximum Length:** N/A

**Format/Example:** 0 (0 is false, 1 is true)

**Valid Values:** 0 or 1

**Sensitivity Level:** Undefined

**Steward:** National Coordination System Committee

**Version:** 1
