Interagency Aviation Technical Assistance Directory

PMS 504
April 2017
NFES 002512

The *Interagency Aviation Technical Assistance Directory* is published annually as a single-source list of federal, state, and tribal employees who work within the aviation community.

The National Wildfire Coordinating Group (NWCG) provides national leadership to enable interoperable wildland fire operations among federal, state, tribal, and local partners. NWCG operations standards are interagency by design; they are developed with the intent of universal adoption by the member agencies. However, the decision to adopt and utilize them is made independently by the individual member agencies and communicated through their respective directives systems.
