

**NWCG**  
**POSITION CODE AND TITLE**  
**Standard Data Values**

December 17, 2018

Standard data values are provided when a data element has a pre-determined set of terms, codes, and/or numbers that must be used in order for the data to be valid. The purpose of standard data values is to ensure consistency and accuracy within the system and across multiple systems.

---

The Position Naming Board (PNB) website serves as the system of record for Position Codes and Position Titles. The valid Position Codes and Position Titles are available at <https://www.nwcg.gov/committees/position-naming-board/resources>.

---

Guidelines for changing this list of standardized data values can be found in the Change Procedures for this data standard.
