Mission Statement

The intent of annual fireline safety refresher training is to focus line-going personnel on operations and decision-making issues related to fireline and all-hazard incident safety. Refresher training will ensure firefighters have information regarding current initiatives and the upcoming fire season. Refresher training is provided in order to recognize and mitigate risk, maintain safe practices, and reduce accidents and near misses.

*The 2016 Fire Refresher was built for firefighters, by firefighters.*

Notes to Instructor

Introduction

Annual Fireline Safety Refresher Training is required for all personnel participating in wildland fire who may be subject to assignments on the fireline. Check specific agency policy at the WFSTAR website to determine if this training package meets refresher training requirements of all the attendees.

Expectations

**NOTE: This is not a plug and play product. Instructor preparation and student interaction is required.**

Instructors should facilitate a quality refresher that engages all students no matter their ICS qualification or firefighting experience. The success of this program is dependent on your ability to stimulate meaningful discussion during group exercises. Classes with a wide array of experiences and qualifications can provide an excellent opportunity for the less experienced to be mentored and for the more experienced to rethink old habits.

Instructor Prerequisites

Lead instructors must be at least Single Resource Boss (SRB) qualified, and unit instructors must be at least Firefighter Type 1 (FFT1) qualified.

Adjunct instructors may be utilized to provide limited instruction in specialized knowledge and skills at the discretion of the lead instructor. They must be experienced, proficient and knowledgeable of current issues in their field of expertise.

All instructors will need the knowledge and skills to utilize current educational technology, as it relates to the WFSTAR website. Examples would be streaming and downloading interactive videos as well as the use of apps and mobile devices.
Equipment and Materials

A list of equipment and other material required for course presentation includes:

- Media player
- Instructor Guide and Student Workbooks from WFSTAR website
- Incident Response Pocket Guide, one for each student
- Sign-in sheet/training documentation form
- Flip chart(s) with paper and marking pens
- Download modules from WFSTAR website
- Optional: New Generation Fire Shelter video, NFES #2711
- Optional: The New Generation Fire Shelter booklet, NFES #2710

Administration

The instructor is responsible for identifying necessary equipment, materials, and supplies. The instructor is also responsible for recording attendance and assuring that evaluations are completed and returned:

BY FAX: (208) 387-5378
BY E-MAIL: s80ander@blm.gov

If all modules are utilized, the length of this program is approximately four hours, depending on time allowed for exercises. Additional time will be needed for the fire shelter deployment practice.
Module: Radios of Fire

Overview:

Students will view the “Radios of Fire” video, read the excerpt from the “Standard Operating Procedure (SOP) Workbook” and complete the exercise below and share with the class.

Target Audience: Wildland Firefighters

Time: Video 11 minutes

Exercise: 25 minutes

Instructor Tasks

- Introduce the overview listed above
- Divide the students into small groups after watching the video and work through the discussion as outlined in the exercise below and share with the class
Exercise/Discussion:

Exercise: Take 15 minutes and complete the following exercise.

Break students into groups. Watch the Radios of Fire video. Read “Standard Operating Procedure (SOP) Workbook” in the student workbook. Students will then create Radio SOPs within their groups. Encourage students to utilize the “Scenarios to Ponder” at bottom of student workbook to help them get started. Share SOP’s with audience.

Question for non-fireline students – what part of your job would benefit from utilizing SOPs?

Other Scenarios to Ponder

- Thunderstorm is inbound – radios on or off?
- Items for radio operator to pack with them – batteries, clamshells, extra antenna, frequency sheets
- Rain – do you pack a radio rain cover?

Optional Exercise:

Have students bring radios to RT-130 with them. Watch radio tutorials and have students practice programming and cloning radios.
