NIMSIC Information Technology and Capability Requirement
Reference: https://www.nwcg.gov/wfit-guidance

What existing systems, technology, or databases does NIMSIC use?

- IQCS to evaluate and compare positions, number of positions, and types by geographic area.

- ROSS to evaluate and compare resource types, catalogs, availability, agency capability, capacity, by geographic area.

- NRM to review and compare agreements to access and compare NIMS implementation requirements and capability.

- VIPR to examine aspects of contracts to access and compare NIMS implementation requirements and capability.

What is the specific capability?

- Approve changes or addition of supplements to standards or procedures

- Review and audit standards and procedures to ensure issues and opportunities are properly addressed.

What systems, technology, or databases does NIMSIC need?

- View state of when and where NIMS and related emergency systems and components are being utilized, managed, or altered to ensure issues and opportunities are addressed.
